Shreya Jayi

Computer Science Engineering Student

+91 9686284845 | shreyajayi33@gmail.com | linkedin.com/in/shreya-jayi-89707838a

Professional Summary

Computer Science Engineering student with knowledge of Python, C, SQL, HTML, Artificial Intelligence, Machine Learning, and Neural Networks. Currently gaining practical experience through an AI/ML and Neural Networks internship. Interested in software development, AI/ML, and building technology solutions for real-world problems. Strong foundation in programming, problem solving, and logical thinking, with hands-on project experience in GPS tracking, web applications, and agentic AI.

Technical Skills

Programming Languages: Python, C
Web Technologies: HTML
Database: SQL
AI/ML: Artificial Intelligence, Machine Learning, Neural Networks, Agentic AI
Core Skills: Problem Solving, Software Development, Logical Thinking

Experience

AI/ML & Neural Networks Intern **2026–Present**
Elien

- Gain hands-on exposure to Artificial Intelligence, Machine Learning, and Neural Network concepts through practical technical work.
- Apply programming, analytical thinking, and problem-solving skills to AI-focused tasks and intelligent-system solutions.
- Develop an understanding of AI/ML workflows, neural-network concepts, and their practical applications.
- Strengthen software development skills by translating technical concepts into structured and solution-oriented implementations.

Projects

Women Safety Device Using GPS Tracking

- Developed a safety-oriented solution using GPS tracking to provide location awareness and support emergency assistance.
- Designed the solution around real-time location tracking to enable faster access to location information during emergency situations.
- Applied programming and problem-solving concepts to address a practical personal-safety use case.

Weather App

- Developed a web-based weather application with a simple and user-friendly interface for displaying weather information.
- Applied HTML and programming fundamentals to structure the application and provide an accessible user experience.
- Focused on clear presentation of weather information and straightforward application usability.

AURA – Agentic AI Phone Manager

- Developed an agentic AI concept designed to assist users with phone-related tasks through intelligent automation.
- Explored AI-agent principles including user-intent interpretation, decision-making, task coordination, and automated actions.
- Applied Artificial Intelligence and software development concepts to explore practical applications of autonomous AI agents.

Education

Computer Science Engineering **2025**
East Point College of Engineering

Certifications

- **Introduction to ECE** — Cursa
- **Basics of Python** — Infosys Springboard
- **Basics of C Programming** — Infosys Springboard

Achievements & Activities

QuizOff 2026: India's Biggest AI Quiz — CampusCrew, Unstop

- Participated in a national-level Artificial Intelligence quiz with 5,25,000+ students, demonstrating interest in AI, emerging technologies, and technical knowledge.
